Pesticide Container Recycling Conserves Resources!

Every ton of HDPE plastic recycled into new products, as compared to using virgin HDPE plastic results in an energy savings of 51,400,000 BTUs; the equivalent of 450 gallons of gasoline

The recycling of 125,000,000 lbs of pesticide containers has resulted in:

- Savings of more than 625,000 cubic yards of landfill space (a football field filled 350 feet deep!)

- Reduction of 88,430 metric tons of carbon dioxide equivalent

- Energy savings equal to 25,863,000 gallons of gasoline

- The equivalent of 29,970 households’ annual energy consumption
